Further support	3
About this volume	3
2 Data protection	5
Reading	5
Introduction	5
Data recovery	6
Transactions and transaction recovery	7
Database recovery	11
SQL support	13
Two-phase commit	13
Concurrency control	14
Concurrency problems	14
Locking	16
Deadlocks	17
Serialisability	19
SQL support	20
Data security	20
SQL support	22
Learning outcomes	24
3 Distributed database systems	25
Reading	25
Introduction	25
Objectives	27
Problems	32
Advantages and disadvantages	36
Learning outcomes	36
4 Advanced database systems	37
Reading	37
Introduction	38
Limitations of the relational model	39
Deductive databases	41
Data definition	43
Querying the database	44
Updating operations	44
Integrity constraints	45
Conclusions	46

OO database systems	47
OO concepts	48
OO database languages	48
OO database management systems	49
Object relational database systems	51
Third generation database systems	51
Learning outcomes	51
